New Projects

Digging Digital Museum Collections
- Leverage digitized museum collections and related digital resources for public engagement, instruction, and lifelong learning
- Create training and consulting services for partner institutions to make better use of their digitized data and collections

Digital Data Stories
- Craft open access, multimodal, interactive narratives backed by open, reproducible analytic and visualization code and primary research data
- Design scaffolding to guide professionals, students, and lifelong learners in thoughtful engagement with research data
- Widen and diversify community engagement with cultural heritage data

Sustainability, Collaboration, & Network Building
- Establish institutional partnerships with libraries, museums, academic institutions, publishers, and other cultural heritage organizations
- Develop training, consulting, and professional development services for our partners
