

# OPEN CONTEXT

*a service of the* ALEXANDRIA ARCHIVE INSTITUTE

## Let's Make A Data Story: How To Create A Public-Facing Data-Driven Archaeology Narrative

---

Participants in this workshop will explore two themes: data-driven digital storytelling and public scholarship. They will also learn about the benefits of using linked open data, building on ongoing discussions about ethical best data practices and standards. As an interactive event, this workshop will appeal to those interested in cultivating new skills who might be pursuing careers inside or outside of the academy.
